

# Are you a nurse practitioner caring for adults with chronic diseases in the outpatient setting?

---

## What is the Purpose of this Study?

We want to learn more about your satisfaction with outpatient care delivered in-person versus telehealth and about your outpatient chronic care delivery experiences.

We are collecting information on nurse practitioner satisfaction through a one-time, online survey. Depending on whether or not you provide chronic disease care in-person and/or via telehealth, this survey could take 10-20 minutes. If you are interested in also participating in an interview about your experiences, you will have the opportunity to share your contact information at the end of the survey.

## Who Can Participate?

- Certified Nurse Practitioners who:
- Self-identify as providers for adults with chronic diseases
- Work in the outpatient setting
- Have provided outpatient chronic disease care in-person and/or via telehealth

## Would You Like to Participate?

If you are interested, please follow [this link](#) or scan the QR code to take the survey.

You will have the opportunity to enter a raffle of five gift cards upon completion of the survey. Those who are selected for an interview will be compensated for their time.
